Memo to File:

Re: Geokinetics  
Utah Experimental Site #1  
Uintah County, Utah  
ACT/047/002

On December 12, 1978, Ron Daniels, Mike Minder and Mary Ann Wright visited this site and inspected the mining and revegetation activities. Mike Leidich, the field superintendent, answered questions and took us on a tour of the site facilities. The visit was to determine any final requirements for the final approval process of the mining plan.

It was apparent from the number of trailers and retort areas that operations have expanded since Division personnel's last visit. Therefore, an updated surface facilities map was requested. A tour of the operations included the lab, a seeded retort area, 'hot' retort areas, one which was being prepared for blasting, and the weather station.
